

The Tables in Appendix A of the 2025 Central Florida Water Initiative (CFWI) Regional Water Supply Plan (RWSP) are numbered differently in the 2025 CFWI RWSP than in this Excel file to allow for formatting in the 2025 CFWI RWSP. Below is a summary to assist in comparing these Excel tables with the Appendix A formatted tables.

---

**2020 RW by County Tab** is not a table represented in Appendix A of the 2025 CFWI RWSP. The information contained in this tab was developed to support the base year data for the associated reclaimed water projections.

**Appendix A Format Tab** is represented by: Table A-13a (2020 Reuse flows and reuse categories by facility, county, and District in the CFWI Planning Area) and Table A-13b (Summary of 2020 Reuse flows and reuse categories by District in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

**2045 RW Projections Tab** is represented by: Table A-13c (2020 estimates and 2045 projections for total service area population, septic population, and adjusted service area population by wastewater treatment facility, county, and District in the CFWI Planning Area), Table A-13d (Summary of 2020 estimates and 2045 projections for total service area population, septic population, and adjusted service area population by District in the CFWI Planning Area), Table A-13e (2020, 2045 projected additional, and 2045 projected total flows for wastewater, beneficial reuse, and supplemental flows by facility, county, and District in the CFWI Planning Area), and Table A-13f (2020, 2045 projected additional, and 2045 projected total flows for wastewater, beneficial reuse, and supplemental flows by District in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

Notes:

- 1.) All values are shown in million gallons per day.
- 2.) 2020 information obtained from FDEP 2020 Reuse Inventory. Information was modified as a result of stakeholder feedback where appropriate.
- 3.) Differences between wastewater flows at treatment facilities and the sum of water reused and disposed from these facilities can exist due to the addition of post-treatment supplemental water (e.g., concentrate), transfer of flows between facilities, in-facility processes etc. that can lead to double counting of flows, and/or metering inaccuracies.

2020 CFWI Summary	
Total Wastewater Flows	213.52
Total Wastewater Flows including Supplementation and Imports	240.70
Beneficial Reuse	228.29
% Beneficial Reuse	95%
Total WW Disposal	12.42

2010 CFWI Reuse = 178 mgd  
2015 CFWI Reuse = 212 mgd

Notes:

- 1.) All values are shown in million gallons per day.
- 2.) 2020 information obtained from FDEP 2020 Reuse Inventory. Information was modified as a result of stakeholder feedback where appropriate.
- 3.) Differences between wastewater flows at treatment facilities and the sum of water reused and disposed from these facilities can exist due to the addition of post-treatment supplemental water (e.g., concentrate), transfer of flows between facilities, in-facility processes etc. that can lead to double counting of flows, and/or metering inaccuracies.
