

The Tables in Appendix A of the 2025 Central Florida Water Initiative (CFWI) Regional Water Supply Plan (RWSP) are numbered differently in the 2025 CFWI RWSP than in this Excel file to allow for formatting in the 2025 CFWI RWSP. Below is a summary to assist in comparing these Excel tables with the Appendix A formatted tables.

Table 1 is represented by Table A-1a. (Population estimates for 2020 and population projections for 2025-2045 by county in the CFWI Planning Area: Public supply (PS)) and Table A-1b (Population estimates for 2020 and population projections for 2025-2045 by county in the CFWI Planning Area: Domestic and small public supply systems (DSS)) in Appendix A of the 2025 CFWI RWSP.

Table 2 is represented by Table A-2 (Total water use for 2020, 5-in-10 year total water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by category of use in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

Table 3 is represented by Table A-3 (Total Water use for 2020, 5-in-10 year water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by county in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

Table 4 is represented by Table A-4-1a (Public supply (PS) population served and water use for 2020, PS population and 5-in-10 year water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by county in the CFWI Planning Area: Population values) and Table A-4-1b (Public supply (PS) population served and water use for 2020, PS population and 5-in-10 year water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by county in the CFWI Planning Area: Demand values) in Appendix A of the 2025 CFWI RWSP.

Table 5 is represented by Table A-5-1a (Public supply (PS) population served and water use for 2020, PS population projections and 5-in-10 year water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by county and utility in the CFWI Planning Area: Population values) and Table A-5-1b (Public supply (PS) population served and water use for 2020, PS population and 5-in-10 year water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by county and utility in the CFWI Planning Area: Demand values) in Appendix A of the 2025 CFWI RWSP.

Table 5a is represented by Table A-5a (2016-2020 water use, population served, and 5-year gross per capita averages for Public Supply (PS) permitted equal to or greater than 0.10 mgd in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

Table 6 is represented by Table A-6-1a (Domestic self-supply (DSS) and small public supply systems (SPSS) population and water use for 2020, DSS and SPSS population projections and 5-in-10 year water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2020-2045 by county in the CFWI Planning Area: Population values) and Table A-6-1b (Domestic self-supply (DSS) and small public supply systems (SPSS) population and water use for 2020, DSS and SPSS population projections and 5-in-10 year water demand projections for 2025-2045, and 1 in-10 year water demand projections for 2045 and county in the CFWI Planning Area: Demand values) in Appendix A of the 2025 CFWI RWSP.

Table 6a is represented by Table A-6a-1a (Domestic self-supply (DSS) population and water use for 2020, population projections and 5-in-10 year water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2025-2045 by county in the CFWI Planning Area: Population values) and Table A-6a-1b (Domestic self-supply (DSS) population and water use for 2020, population projections and 5-in-10 year water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2025-2045 by county in the CFWI Planning Area: Demand values) in Appendix A of the 2025 CFWI RWSP.

Table 6b is represented by Table A-6b-1a (2016-2020 residential water use 5-year per capita averages for all public supply (PS) permittees in the CFWI Planning Area: 2016-2017 by county), Table A-6b-1b (2016-2020 residential water use 5-year per capita averages for all public supply (PS) permittees in the CFWI Planning Area: 2018-2019 by county), and Table A-6b-1c (2016-2020 residential water use 5-year residential per capita averages for all public supply (PS) permittees in the CFWI Planning Area: 2020 by county) in Appendix A of the 2025 CFWI RWSP.

Table 6c is represented by Table A-6c-1a (Small public supply population served and water use for 2020, small public supply population projections and 5-in-10 year water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by county and utility in the CFWI Planning Area: Population values) and Table A-6c-1b (Small public supply population served and water use for 2020, small public supply population projections and 5-in-10 year water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by county and utility in the CFWI Planning Area: Demand values) in Appendix A of the 2025 CFWI RWSP.

Table 6d is represented by Table A-6d (2016-2020 water use, population served, and 5-year gross per capita averages for small public supply systems (permitted less than 0.10 mgd) in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

The Tables in Appendix A of the 2025 Central Florida Water Initiative (CFWI) Regional Water Supply Plan (RWSP) are numbered differently in the 2025 CFWI RWSP than in this Excel file to allow for formatting in the 2025 CFWI RWSP. Below is a summary to assist in comparing these Excel tables with the Appendix A formatted tables.

Table 7 is represented by Table A-7-1a (Agricultural irrigation self-supply water use, miscellaneous agricultural water use, and acreage for 2020, 5-in-10 year water demand and acreage projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by county in the CFWI Planning Area: Demand values) and Table A-7-1b (Agricultural irrigation self-supply water use, miscellaneous agricultural water use, and acreage for 2020, 5-in-10 year water demand and acreage projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by county in the CFWI Planning Area: Acreage values) in Appendix A of the 2025 CFWI RWSP.

Table 7a is represented by Table A-7a (Agricultural irrigation self-supply water use (including miscellaneous water use) and acreage for 2020, 5-in-10 year water demand projections and acreage projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by crop category and county in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

Table 7b is represented by Table A-7b (Miscellaneous agricultural self-supply water use for 2020, 5-in-10 year water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by county in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

Table 8 is represented by Table A-8 (Landscape/recreational (LR) self-supply water use for 2020, 5-in-10 year water demand projections for 2025-2045, and 1-in 10 year water demand projections for 2045 by county in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

Table 8a is represented by Table A-8a-1a (2016-2020 water use, total county population, and five-year gross per capita averages for Landscape/Recreational (LR) and LR water demand increases by county in the CFWI Planning Area: Historic values) and Table A-8a-1b (2016-2020 water use, total county population, and five-year gross per capita averages for Landscape/Recreational (LR) self-supply and LR water demand increases by county in the CFWI Planning Area: Projected values) in Appendix A of the 2025 CFWI RWSP.

Table 9 is represented by Table A-9 (Commercial/Industrial/Institutional (CII) and Mining/Dewatering (MD) self-supply water use for 2020 and 5-in-10 year water demand projections for 2025-2045 by county in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

Table 9a is represented by Table A-9a-1a (2016-2020 water use, total county population, and five-year gross per capita averages for Commercial/Industrial/Institutional (CII) and Mining/Dewatering (MD) self-supply water demand increases in the CFWI Planning Area: Historic values) and Table A-9a-1b (2016-2020 water use, total county population, and five-year gross per capita averages for Commercial/Industrial/Institutional (CII) and Mining/Dewatering (MD) self-supply water demand increases in the CFWI Planning Area: Projected values) in Appendix A of the 2025 CFWI RWSP.

Table 10 is represented by Table A-10 (Power generation self-supply water use for 2020 and 5-in-10 year water demand projections for 2025-2045 by county in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

Table 10a is represented by Table A-10a (Power generation self-supply water use for 2020 and 5-in-10 year water demand projections for 2025-2045 by county and facility in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

Table 10b is represented by Table A-10b-1a (2016-2020 water use and megawatts, five-year average gallons per megawatt, and 2025-2045 megawatt and 5-in-10 year water demand projections for power generation self-supply in the CFWI Planning Area: Historic water use), Table A-10b-1b (2016-2020 water use and megawatts, five-year average gallons per megawatt, and 2025-2045 megawatt and 5-in-10 year water demand projections for power generation self-supply in the CFWI Planning Area: Historic and projected megawatts), and Table A-10b-1c (2016-2020 water use and megawatts, five-year average gallons per megawatt, and 2025-2045 megawatt and 5-in-10 year water demand projections for power generation self-supply in the CFWI Planning Area: Projected water demand) in Appendix A of the 2025 CFWI RWSP.

Table 11 is represented by Table A-11 (Public supply (PS) and domestic self-supply (DSS) and small public supply systems (SPSS) water use for 2020, 5-in-10 year water demand projections for 2025-2045, and 1-in -10 year water demand projections for 2045 by county in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

The Tables in Appendix A of the 2025 Central Florida Water Initiative (CFWI) Regional Water Supply Plan (RWSP) are numbered differently in the 2025 CFWI RWSP than in this Excel file to allow for formatting in the 2025 CFWI RWSP. Below is a summary to assist in comparing these Excel tables with the Appendix A formatted tables.

Table 12 is represented by Table A-12-1 (Lake County: Water use for 2020, 5-in-10 year total water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by category of use in the CFWI Planning Area), Table A-12-2 (Orange County: Water use for 2020, 5-in-10 year total water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by category of use in the CFWI Planning Area), Table A-12-3 (Osceola County: Water use for 2020, 5-in-10 year total water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by category of use in the CFWI Planning Area), Table A-12-4 (Polk County: Water use for 2020, 5-in-10 year total water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by category of use in the CFWI Planning Area), and Table A-12-5 (Seminole County: Water use for 2020, 5-in-10 year total water demand projections for 2025-2045, and 1-in-10 year water demand projections for 2045 by category of use in the CFWI Planning Area) in Appendix A of the 2025 CFWI RWSP.

Table A-1. Population Estimates for 2020 and Population Projections for 2025-2045 by County in the Central Florida Water Initiative Planning Area.

County	District	CFWI BEBR County Population	CFWI Public Supply Population 2020	CFWI Domestic and Small Public Supply Systems Population	CFWI BEBR County Population	CFWI Public Supply Population 2025	CFWI Domestic and Small Public Supply Systems Population	CFWI BEBR County Population	CFWI Public Supply Population 2030	CFWI Domestic and Small Public Supply Systems Population	CFWI BEBR County Population	CFWI Public Supply Population 2035	CFWI Domestic and Small Public Supply Systems Population	CFWI BEBR County Population	CFWI Public Supply Population 2040	CFWI Domestic and Small Public Supply Systems Population	CFWI BEBR County Population	CFWI Public Supply Population 2045	CFWI Domestic and Small Public Supply Systems Population	CFWI BEBR County Population Percent Change 2020-2045	CFWI Public Supply Population Percent Change 2020-2045	CFWI Domestic and Small Public Supply Systems Population Percent Change 2020-2045

Notes:

- 1.) 2025 to 2045 county population projections were obtained from BEBR Population Projections: Bulletin 192, Published April 2022.
- 2.) Population projections shown here are permanent population projections only and do not include any factors such as seasonal residents, tourist population or net commuter population.
- 3.) Public water supply utility service areas often include residences that derive their water supply from privately owned (domestic self-supply) wells. Typically, these domestic self-supply water uses existed prior to their locations becoming part of public water supply service areas. For public water supply service areas, the Districts do not have sufficient information to separate the populations served by public supply systems from those served by domestic self-supply wells. Therefore, public water supply populations estimated by the Districts often include some domestic self-supply population. In certain counties the domestic self-supply population is projected to decrease.
- 4.) Osceola 2045 population deviated from BEBR to account with growth in Sector Plan.

Table A-2. Water Use for 2020, 5-in-10 Year Total Water Demand Projections for 2025-2045, and 1-in-10 Year Water Demand Projections for 2045 by Category of Use in the Central Florida Water Initiative Planning Area.

Notes:

1.) All water use and water demand projections are shown in million gallons per day.

2.) Rounding errors account for nominal discrepancies.

3.) 2025 to 2045 county population projections were obtained from BEBR Population Projections: Bulletin 192, Published April 2022.

4.) Per capita used to calculate demand projections is an average from 2016 - 2020 and is calculated as (Total Water Use / Total Estimated Population). This per capita is commonly referred to as a gross per capita, as it includes all uses within a utility.

5.) 1-in-10 rainfall year water demand for 2045 calculated as an additional 6 percent of 2045 average water demand.

6.) Surface water quantities were obtained from permits, with the exception of Manufactured Home Communities. Surface water for Manufactured Home Communities estimated using the permitted surface water to total permitted allocation ratio due to water demand being lower than surface water permit quantities.

7.) Public water supply utility service areas often include residences that derive their water supply from privately owned (domestic self-supply) wells. Typically, these domestic self-supply water uses existed prior to their locations becoming part of public water supply service areas. For public water supply service areas, the Districts do not have sufficient information to separate the water use demand served by public supply systems from those served by domestic self-supply wells. Therefore, public water supply water demands estimated often include some domestic self-supply demand.

8.) OCU historic and projected population was modified from BEBR deliverable to account for known domestic self-supply within the service area and to add a one percent conversion per year of domestic self-supply to the public supply system, per OCU feedback received.

9.) OUC historic and projected population was modified from BEBR deliverable to account for residential utility accounts served, per OUC feedback received.

10.) Polk County build-out and City of Lakeland population projections numbers updated from BEBR deliverable as a result from SWFWMD feedback.

Table A-5a. 2016-2020 Water Use, Population Served, and Five-Year Gross Per Capita Averages for Public Supply Permitted Equal to or Greater than 0.10 mgd in the Central Florida Water Initiative Planning Area.

Notes:

- 1.) All water use and water demand projections are shown in million gallons per day.
- 2.) Rounding errors account for nominal discrepancies.
- 3.) ECFS totals shown here for Osceola County only include the wells and pumpage for houses, hunt camps, visitor centers, etc.
- 4.) 2016-2020 water use obtained from the Districts' metered data, published annual reports, and the Florida Department of Environmental Protection monthly operating report data.
- 5.) 2016-2020 population obtained from BEBR estimates of population produced for this 2025 CFWI RWSP.
- 6.) OCU and OUC historic and projected population was modified from BEBR deliverable to account for known domestic self-supply within the respective service areas.

Table A-6. Domestic Self-supply and Small Public Supply Systems Population and Water Use for 2020, Domestic Self-supply and Small Public Supply Systems Population Projections and 5-in-10 Year Water Demand Projections for 2025-2045, and 1-in-10 Year Water Demand Projections for 2045 by County in the Central Florida Water Initiative Planning Area.

Notes:

- 1.) All water use and water demand projections are shown in million gallons per day.
- 2.) Rounding errors account for nominal discrepancies.
- 3.) Public water supply utility service areas often include residences that derive their water supply from privately owned (domestic self-supply) wells. Typically, these domestic self-supply water uses existed prior to their locations becoming part of public water supply service areas. For public water supply service areas, the Districts do not have sufficient information to separate the populations served by public supply systems from those served by domestic self-supply wells. Therefore, public water supply populations estimated often include some domestic self-supply population.
- 4.) 1-in-10 rainfall year water demand for 2045 calculated as an additional 6 percent of 2045 average water demand.

Table A-6a. Domestic Self-Supply Population and Water Use for 2020, Population Projections and 5-in-10 Year Water Demand Projections for 2025-2045, and 1-in-10 Year Water Demand Projections for 2045 by County in the Central Florida Water Initiative Planning Area.

- Notes:
- 1.) All water use and water demand projections are shown in million gallons per day. Average water use is shown in gallons per consumer per day (gpcd).
 - 2.) Rounding errors account for nominal discrepancies.
 - 3.) 2025 to 2045 county population projections were obtained from BEBR Population Projections: Bulletin 192, Published April 2022.
 - 4.) Population projections shown here are permanent population projections only and do not include any factors such as seasonal residents, tourist population or net commuter population.
 - 5.) Per capita used to calculate demand projections is an average from 2016-2020 and is calculated as (Total County-wide Residential Water Use / Total Estimated Population). This per capita is commonly referred to as a residential per capita, as it only includes the indoor and outdoor residential uses.
 - 6.) 1-in-10 rainfall year water demand for 2045 calculated as an additional 6 percent of 2045 average water demand.

Table A-6b. 2016-2020 Residential Water Use and Five-Year Residential Per Capita Averages for All Public Supply Permittees in Counties in the Central Florida Water Initiative Planning Area.

- Notes:
- 1.) All water use and water demand projections are shown in million gallons per day.
 - 2.) Rounding errors account for nominal discrepancies.
 - 3.) 2025 to 2045 county population projections were obtained from BEBR Population Projections: Bulletin 192, Published April 2022.
 - 4.) Population projections shown here are permanent population projections only and do not include any factors such as seasonal residents, tourist population or net commuter population.
 - 5.) Per capita used to calculate demand projections is an average from 2016 - 2020 and is calculated as (Total Water Use / Total Estimated Population). This per capita is commonly referred to as a gross per capita, as it includes all uses within a utility.
 - 6.) 1-in-10 rainfall year water demand for 2045 calculated as an additional 6 percent of 2045 average water demand.
 - 7.) Surface water quantities were obtained from permits.

Table A-6d. 2016-2020 Water Use, Population Served, and Five-Year Gross Per Capita Averages for Small Public Supply Systems (Permitted Less than 0.10 mgd) in the Central Florida Water Initiative Planning Area.

Notes:

- 1.) All water use and water demand projections are shown in million gallons per day.
- 2.) Rounding errors account for nominal discrepancies.
- 3.) 2016-2020 water use obtained from the Districts' metered data, published annual reports, and the Florida Department of Environmental Protection monthly operating report data.
- 4.) 2016-2020 population obtained from BEBR estimates of population produced for this 2025 CFWI RWSP.

Table A-7. Agricultural Irrigation Self-supply Water Use, Miscellaneous Agricultural Water Use, and Acreage for 2020, 5-in-10 Year Water Demand and Acreage Projections for 2025-2045, and 1-in-10 Year Water Demand Projections for 2045 by County in the Central Florida Water Initiative Planning Area.

Notes:

- 1.) All water use and water demand projections are shown in million gallons per day.
- 2.) Rounding errors account for nominal discrepancies.
- 3.) 2020 estimated irrigated acres and water use derived from FSAID IX AG layer, deliverable dated July 2022 from The Balmoral Group as Florida Department of Agriculture and Consumer Services representative. 2020 water use for the SJRWMD portion of Osceola County was changed to reflect actual estimate of water use to account for FSAID IX under estimation.
- 4.) 2025-2045 acreage projections and 2025-2045 average and 1-in-10 year water demand projections derived from FSAID IX AG layer, from The Balmoral Group as Florida Department of Agriculture and Consumer Services representative.
- 5.) 2025-2045 groundwater / surface water split estimated using 2020 ratios.
- 6.) FSAID IX Agricultural demands for SJRWMD portion of Osceola County updated to reflect requirements of approved North Ranch Sector Plan in Osceola County portion of SJRWMD.
- 7.) Water demand projections for the North Ranch Sector Plan are representative of 2-in-10 year water demand conditions.
- 8.) FSAID IX Demand in SFWMD for expired permits was not incorporated into the ECFTX geodatabase.

Table A-7a. Agricultural Irrigation Self-supply Water Use (Including Miscellaneous Water Use) and Acreage for 2020, 5-in-10 Year Water Demand Projections and Acreage Projections for 2025-2045, and 1-in-10 Year Water Demand Projections for 2045 by Crop Category and County in the Central Florida Water initiative Planning Area.

Notes:

- 1.) All water use and water demand projections are shown in million gallons per day.
- 2.) Rounding errors account for nominal discrepancies.
- 3.) 2020 estimated irrigated acres and water use derived from FSAID IX AG layer (including metered water use data where available), deliverable dated July 2022 from The Balmoral Group as Florida Department of Agriculture and Consumer Services representative. 2020 values will not match the Districts' published reports.
- 4.) 2025-2045 acreage projections and 2025-2045 average and 1-in-10 water demand projections derived from FSAID IX AG layer, from The Balmoral Group as Florida Department of Agriculture and Consumer Services representative.
- 5.) 2020 estimated acreage and 2025-2045 acreage projections only account for Irrigated Cropland Acreage from FSAID IX AG Layer.

Table A-7b. Miscellaneous Agricultural Self-supply Water Use for 2020, 5-in-10 Year Water Demand Projections for 2025-2045 and 1-in-10 Year Water Demand Projections for 2045 by County in the Central Florida Water Initiative Planning Area.

Notes:

- 1.) All water use and water demand projections are shown in million gallons per day.
- 2.) Rounding errors account for nominal discrepancies.
- 3.) 2016-2020 water use obtained from the Districts' metered data and published annual reports.
- 4.) 2025-2045 county population projections obtained from Table 1.
- 5.) Stakeholder feedback indicated that there will be no new golf course use within the CFWI RWSP Planning Area. Golf course water use was removed from the per capita calculation.

Notes:

- 1.) All water use and water demand projections are shown in million gallons per day.
- 2.) Rounding errors account for nominal discrepancies.
- 3.) 2020 water use obtained from the Districts' metered data and published annual reports.
- 4.) 2025-2045 projected surface water demand was interpolated based on 2020 percentages.

Table A-9a. 2016-2020 Water Use, Total County Population and Five-Year Gross Per Capita Averages for Commercial/Industrial/Institutional and Mining/Dewatering Self-supply Water Demand Increases, in the Central Florida Water initiative Planning Area.

County	District	Total County Water Use					County Population Within CFWI					2016-2020 Average GPCD	County Population Projections Within CFWI					Increase in County Population Within CFWI					Change in Commercial / Industrial / Institutional & Mining / Dewatering Self-supply Water Demand

Notes:

- 1.) All water use and water demand projections are shown in million gallons per day.
- 2.) Rounding errors account for nominal discrepancies.
- 3.) 2016-2020 water use obtained from the Districts' metered data and published annual reports.
- 4.) 2025-2045 county population projections obtained from Table 1.
- 5.) 2016-2020 water use was reduced to remove power generation (ECFTX classifies under CII/MD) and non-consumptive surface water associated with mining / dewatering.
- 6.) Water use for Polk County CII/MD permits in SWFWMD not impacted by population removed from the calculation for future growth.

Notes:
 1.) All water use and water demand projections are shown in million gallons per day.
 2.) Rounding errors account for nominal discrepancies.
 3.) 2020 water use obtained from the Districts' metered data and published annual reports.
 4.) Consumptive surface water is assumed to be 2 percent of total surface water to account for losses.

Table A-10b. 2016-2020 Water Use and Megawatts, Five-Year Average Gallons Per Megawatt, and 2025-2045 Megawatt and 5-in-10 Year Water Demand Projections for Power Generation Self-supply in the Central Florida Water Initiative Planning Area.

County	Facility	Groundwater Use					Non-Consumptive Saline and Fresh Surface Water Use					Notes	Historic Megawatts					2016-2020 Gallons (Consumptive) Per Megawatt Average	2016-2020 Gallons (Non-Consumptive) Per Megawatt Average	Projected Megawatts					Projected Groundwater Demand					Projected Non-consumptive Saline and Fresh Surface Water Demand

Notes:
 1.) All water use and water demand projections are shown in million gallons per day.
 2.) Rounding errors account for nominal discrepancies.
 3.) 2016-2020 water use obtained from the Districts' metered data and published annual reports.
 4.) 2016-2020 total historic and 2022-2031 future total capacity megawatts obtained from 2022 Ten-Year Site Plans submitted to PSC. Megawatt distribution to individual plants estimated using plant specific capacity in 2022 Ten-Year Site Plans. 2035-2045 future total capacity megawatts extrapolated.

Notes:

- 1.) All water use and water demand projections are shown in million gallons per day.
- 2.) Rounding errors account for nominal discrepancies.
- 3.) Public water supply utility service areas often include residences that derive their water supply from privately owned (domestic self-supply) wells. Typically, these domestic self-supply water uses existed prior to their locations becoming part of public water supply service areas. For public water supply service areas, the Districts do not have sufficient information to separate the population served by public supply systems from those served by domestic self-supply wells. Therefore, public water supply population estimated by the Districts often include some domestic self-supply population.

Table A-12 (1-Lake County (CFWI Portion)). Water Use for 2020, 5-in-10 Year Total Water Demand Projections for 2025-2045, and 1-in-10 Year Water Demand Projections for 2045 by Category of Use in the Central Florida Water Initiative Area.

Notes:

- 1.) All water use and water demand projections are shown in million gallons per day.
- 2.) Rounding errors account for nominal discrepancies.
