

Data Monitoring and Investigations Team

Steering Committee Meeting
October 25, 2013

www.cfwewater.com

Team Goal

The primary goal of this team is to ensure that available hydrologic, environmental, and other **pertinent data** collected throughout the region, that is of a quality that can be used for the CFWI, **is identified, inventoried, and accessible to support the CFWI technical initiatives and CFWI regulatory activities.** The team may also be tasked with conducting supplemental investigations or data analysis as necessary, and with retaining data collected by the other Technical Initiative Teams.

Changes to Schedule

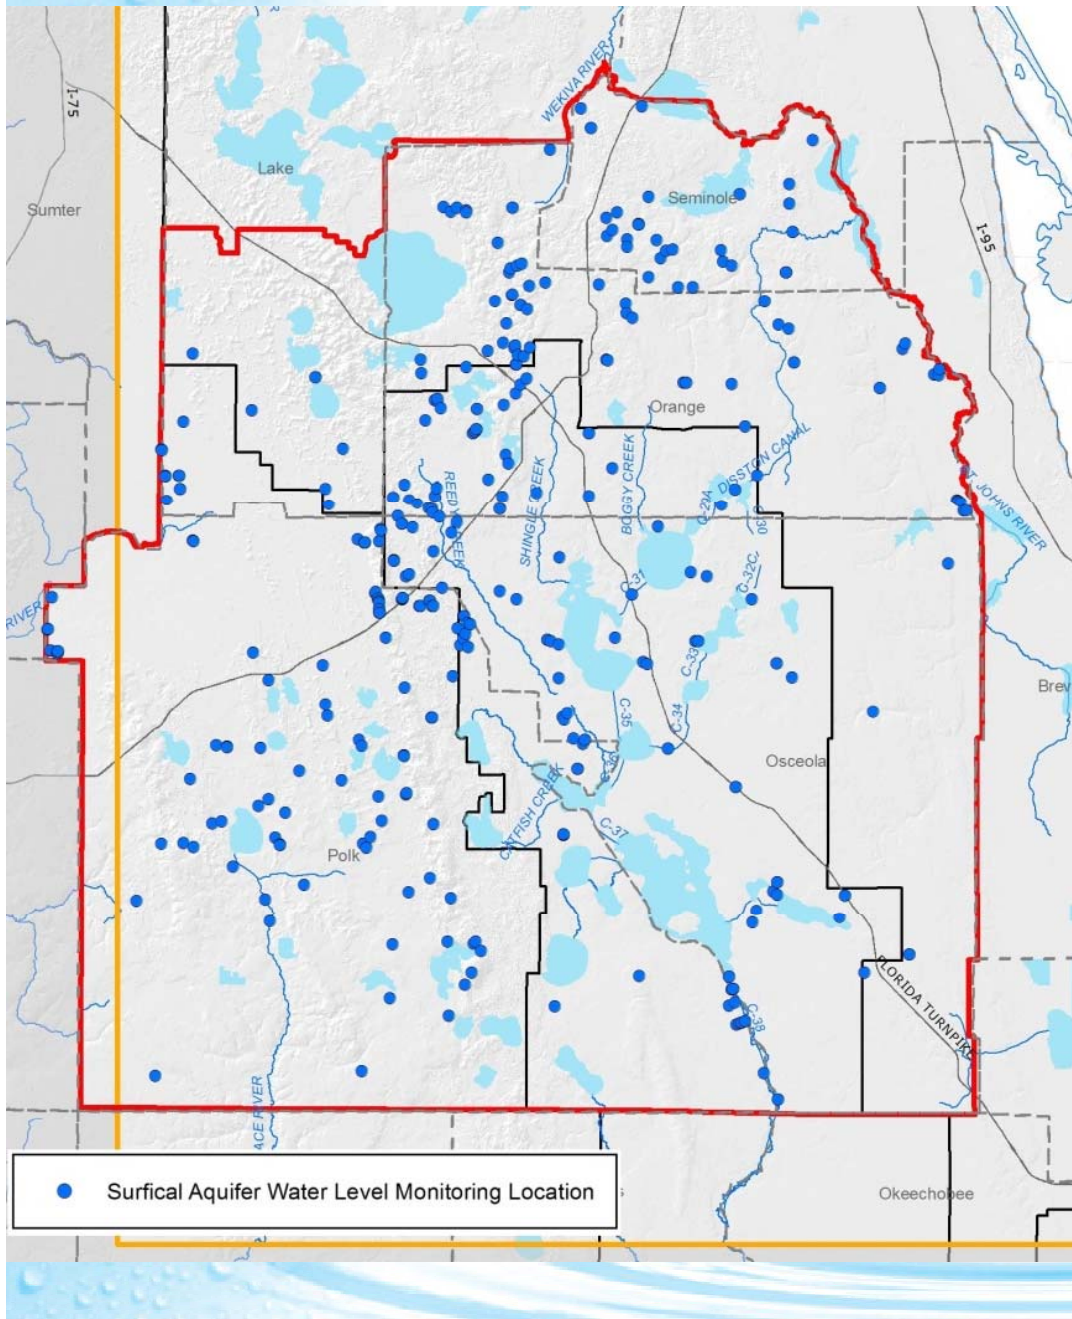

Schedule Components	Standard data inventory sheet (D1)	31-Aug-11	
	Intra-and inter-agency investigation of other existing data (D2)	31-Oct-11	
	Inventory Development (D3)	31-Jan-12 (Ongoing)	
	Establish Minimum Standards for Data Collection (D4)	31-Dec-12 31 Dec 13	
	Develop Recommendations for Regional Monitoring(D5)	31-May-13 1 Mar 14	

Work Completed to Date

- Inventory developed; continues to be updated
- DRAFT “Water Use/Consumptive Use Permits, Wetlands/Surface Waters Monitoring Plan Guidelines” under review by DMIT
- DRAFT spatial monitoring redundancy evaluation performed
- Coordinated with MFLRT, HAT, and EMT on input to be incorporated into recommendation

Inventory

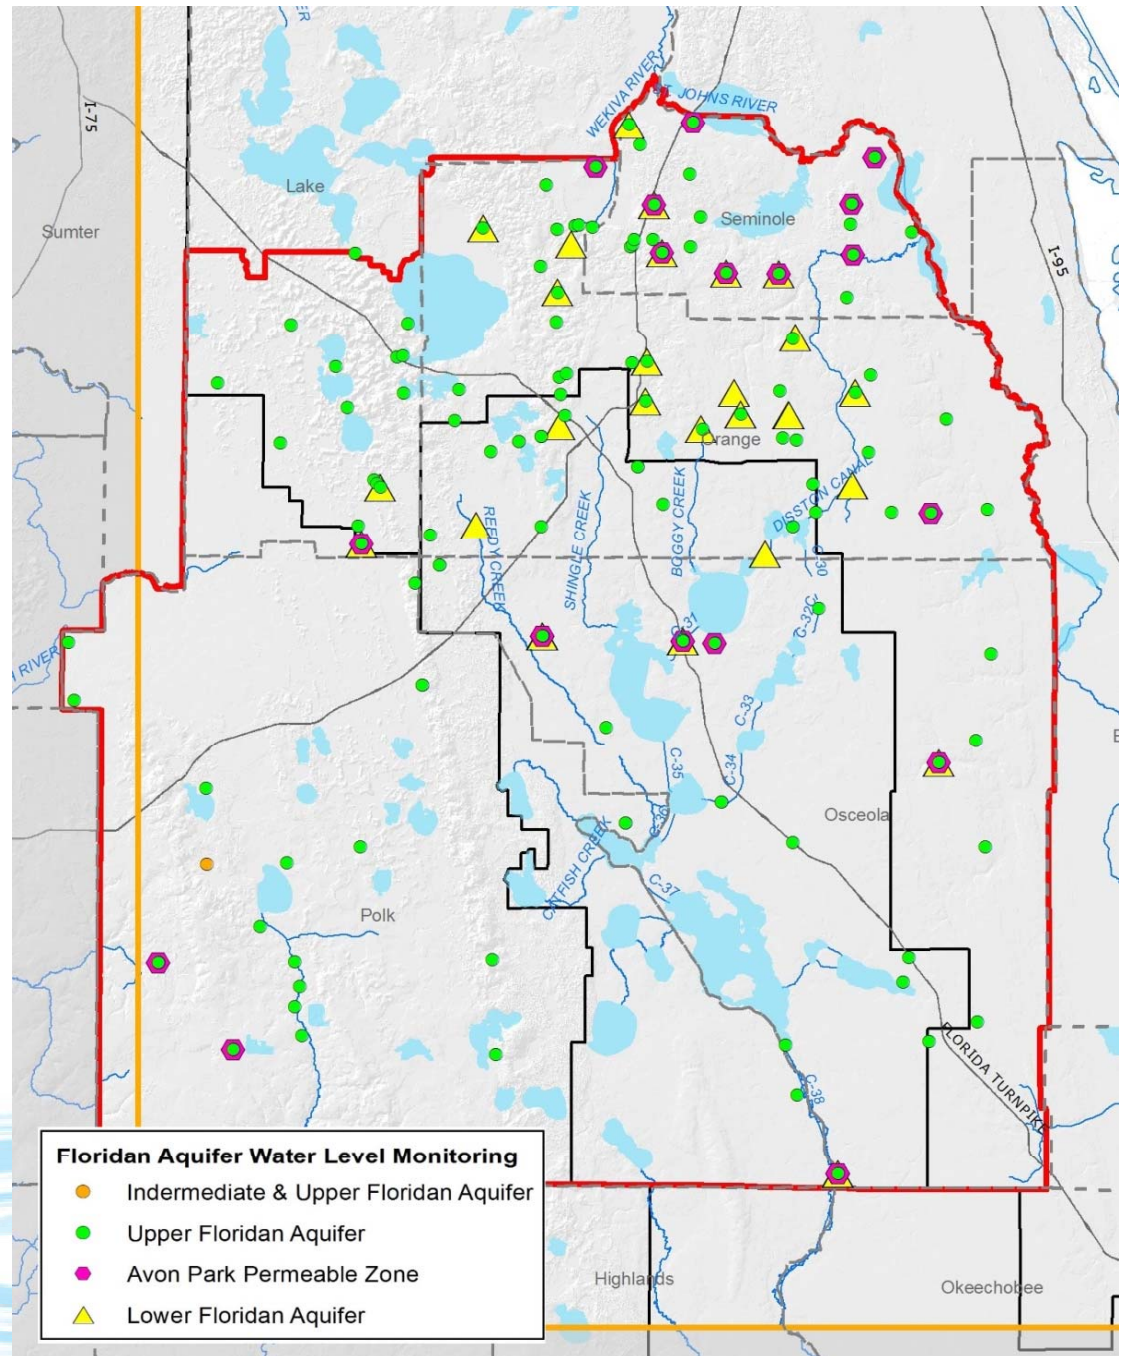

- Surficial Aquifer Piezometers

Central Florida Water Initiative

Inventory

- 1 IAS/UFA
- 118 UFA
- 18 APPZ
- 27 LFA

Future Work

1. Continue coordination with Sub-teams, Solutions Planning and Regulatory teams
2. Complete redundancy evaluation
3. Complete minimum standard for data collection
4. Continue to develop monitoring plan recommendation; present outline to Steering Committee
5. Develop priority activities for recommendation
